REC_DS using C_Week 2_COD_Question 1

Attempt : 1 Total Mark : 10 Marks Obtained : 10

Section 1: Coding

1. Problem Statement

Your task is to create a program to manage a playlist of items. Each item is represented as a character, and you need to implement the following operations on the playlist.

Here are the main functionalities of the program:

Insert Item: The program should allow users to add items to the front and end of the playlist. Items are represented as characters. Display Playlist: The program should display the playlist containing the items that were added.

To implement this program, a doubly linked list data structure should be used, where each node contains an item character.

Input Format

The input consists of a sequence of space-separated characters, representing the items to be inserted into the doubly linked list.

The input is terminated by entering - (hyphen).

Output Format

The first line of output prints "Forward Playlist: " followed by the linked list after inserting the items at the end.

The second line prints "Backward Playlist: " followed by the linked list after inserting the items at the front.

Refer to the sample output for formatting specifications.

Sample Test Case

```
Input: a b c -
    Output: Forward Playlist: a b c
    Backward Playlist: c b a
    Answer
    #include <stdio.h>
    #include <stdlib.h>
    struct Node {
   char item;
      struct Node* next;
      struct Node* prev;
    }:
    // You are using GCC
    void insertAtEnd(struct Node** head, char item) {
      //type your code here
      struct Node* node =(struct Node *)malloc(sizeof(struct Node));
      node->item=item;
      node->next=NULL;
      node->prev=NULL;
*head==NULi
return ·
      if(*head==NULL){
```

```
struct Node* temp=*head;
     while(temp->next!=NULL){
         temp=temp->next; V
       temp->next=node;
       node->prev=temp;
     void displayForward(struct Node* head) {
       //type your code here
ب:=NULL){
| ntf("%c ",head:
| head=head->next;
| printf("\n"\
          printf("%c ",head->item);
     void displayBackward(struct Node* tail) {
       //type your code here
       while(tail!=NULL){
          printf("%c ",tail->item);
          tail=tail->prev;
       }
       printf("\n");
     void freePlaylist(struct Node* head) {
       //type your code here ^
       while(head!=NULL){
          struct Node* temp=head;
          head=head->next;
          free(temp);
       }
     }
     int main() {
       struct Node* playlist = NULL;
        char item;
while (1) {
scanf/"
                                                        241901049
          scanf(" %c", &item);
          if (item == '-') {
```
